

DO NOT RESUSCITATE ORDERS

Board of Education Policy JLCG, Do Not Resuscitate (DNR) Orders, will be fully explained to parents who present DNR orders. A school official shall meet with the parent and physician to determine the child's medical diagnosis, current condition, prognosis and anticipated medical needs. School personnel shall then convene a multidisciplinary team meeting to develop a health management plan for the student, which may include a medical resuscitation plan, and individually appropriate life-sustaining interventions to be followed in a medical emergency. If the parent declines to meet or to agree to a health management plan, this shall be noted in the student's file.

School health personnel and other school or transportation personnel who have been trained in emergency rescue procedures (cardiopulmonary resuscitation [CPR]) are expected to administer first aid, including life-saving or resuscitation procedures, to a student in the event of an accident, choking, respiratory and/or cardiac arrest, or other life-threatening emergency.

Community emergency response personnel (911) will be called immediately and school personnel will continue resuscitation procedures until they are relieved by emergency response personnel.

Once transport of the student from the school to an emergency room or medical facility begins, DNR orders shall become the responsibility of parents and physicians.
